

HISTORIC JET BOAT & EQUIPMENT DATABASE

Questionnaire Form

One of the aims of the JBNZ Heritage Trust is to compile a database which can identify what historic jet boats, jet units, information and other related paraphernalia is still around, then work with owners and curators of this material, now and into the future, to ensure it remains in optimal condition for the benefit of future generations.

For the purposes of building this database we have set a number of general criteria for what constitutes an historic jet boat or jet boat parts, such as age, how close to original condition it is in, and its potential historical significance now and in the future. These parameters are somewhat flexible and just because a jet boat doesn't fit this exact criteria does not necessarily mean it should be excluded from the database. An example of this is a new boat built as a re-creation of an historic boat with original type equipment.

So if you own an older jet boat, jet unit or are in possession of old photos, video or documents relating to jet boating, please fill in the information below with as much detail and accuracy as you can.

You do not need to be based in New Zealand or be a member of JBNZ in order to provide the Heritage Trust with details of the historical material you may have – we encourage any individual or organisation from anywhere in the world to fill out this form so that the database can be used by the Heritage Trust to help us **all** preserve our important jet boating history.

Please note that any personal information you provide in this form will not be shared outside the Heritage Trust Management Committee without your permission.
